

Hyperthyroid treatment on our Pet Health Club

Many cats develop hyperthyroidism as they age, and now that your pet has been diagnosed, we have a range of options to treat their symptoms.

By joining our **Pet Health Club** you're already giving your cat the best chance at a long and healthy life – by bolting on hyperthyroid medication and checks it gives you the peace of mind that the price covers what they need to control their thyroid condition.

As our team will have told you, an overactive thyroid means there is an increase in the hormone which controls the body's metabolic rate. As your metabolism affects all parts of the body, a wide range of symptoms may be present and causing your pet to feel unsettled.

That's why our hyperthyroid extension to our **Pet Health Club** is so important – by monitoring your cat with regular blood tests we can nip problems in the bud and help your cat to enjoy their golden years.

WHAT'S INCLUDED?

Alongside all of your regular Pet Health Club benefits, members who add our hyperthyroid bolt will benefit from:

- Regular comprehensive examinations
- Blood and urine tests
- Blood pressure checks
- Weight checks
- Nutrition advice
- All necessary, licensed hyperthyroid medication

Just £20 / month

on top of the £30 / month PHC plan
